### CAREER OBJECTIVE

To work in a organization with a professional work driven environment where I can utilize and apply my knowledge, skills which would enable me as a fresh graduate to grow while fulfilling organizational goals.

### Achievements

- **BE Project**:-“Phishing Detection using visual cryptography.” It’s our final year project. In that, we used visual cryptography and RSA algorithm to identified phishing website .with the help of this technique users to identify the fake and genuine website .this system is divided into three parts i.e generation of image captcha ,Encryption, and Decryption.
- Published Paper on “Face Recognition Technology” in International Journal of Scientific Research Engineering and Technology (IJSRET), Volume 5, issue ,2016, ISSN: 2278.
- **ME project**:-“Soil classification and crop suggestion using machine learning algorithm”. It’s my final year project of master of engineering. In that, I have used computer based automated system using machine learning algorithm. I have considered soil type, and environmental parameter i.e temperature, moisture and humidity. Using this environmental parameters and soil type our system can predict the suitable crop for that particular land.
- Also published two papers of ME project which is UGC approved. Survey paper is published in JETIR and implementation paper is published in IJRECE.
